Hand washing

Experts recommend washing your hands for at least 20 seconds. That's about how long it takes to sing Happy Birthday. Or...if you really want to show your Nebraska spirit, give There is No Place Like Nebraska! a try.

There is no place like Nebraska,
Dear old Nebraska U.

Where the girls are the fairest,

The boys are the squarest,

Of any old school that I knew.

There is no place like Nebraska,

Where they're all true blue.

We'll all stick together,

In all kinds of weather,

For dear old Nebraska U.

Nebraska is going in the wrong direction on COVID. Together, we can turn this around. We need to keep our essential workers healthy and prevent further shutdown of any businesses. If we all work together, we can help slow the spread of COVID-19.

Masks

Our actions and efforts reflect our support for everyone within our community. The decision to wear a mask promotes health and respect, and recognizes risk during this pandemic. @Nebraska.Healthcare.Marketers @Nehospitals

Hand washing

Washing your hands is one of the easiest ways to prevent the spread of germs. The CDC recommends washing your hands with soap and water for at least 20 seconds. No access to soap or clean water? An alcohol-based hand rub that contains 60% alcohol is a good alternative. @Nebraska.Healthcare.Marketers @Nehospitals #washyourhands #coveryourmouth #spreadlovenotgerms #makingadifference #strongertogether #weareinthistogethernebraska #weareinthistogetherne #nestrong
